

Get the  
**SMILE YOU  
 DESERVE**  
 With a Visit to  
 The Dan Landry  
 Denture Clinic

**A PERFECT SMILE CAN MAKE** all the difference in your self-image. If you're not happy with your teeth or you simply want to have an eye-catching smile, a visit to the Dan Landry Denture Clinic will help.

Few denture clinics have the long history of success that precedes the Dan Landry Denture Clinic. John Gecelovsky, Dan's father-in-law began working in Windsor at the young age of 18 as a lab technician and became a skilled Denturist very quickly. He opened his first office at 700 Tecumseh Rd. in 1976 and enjoyed the success of a thriving business working out of the main Windsor Health Centre office and a second office at the Essex Dental Centre.

Dan became involved in the family business after marrying John's daughter Lisa. They moved to Windsor in 1991, where Dan opened a practice in the Belle River Dental Office with Dr. Peter Courey and the late Dr. Arnie Sylvestre. He shared lab space with his father in law which allowed him to learn John's techniques and trade secrets. John was one of the first denturists to work with implants in the Windsor area and shared his knowledge with Dan.

The two formed a successful partnership which combined the new techniques brought forward by Dan and the talents of a man who had been working this profession for over 40 years.

"John was loved by his patients and respected by his colleagues. He was devoted to his work and made sure the patients had the best care. He died in 2012, but his patients still come in to the office and say how much they miss him."

Dan became full owner of three offices in 1998 and The Dan Landry Denture Clinic was born. Dan ensures that John's legacy continues through his commitment to providing patients with the same level of

superior service and quality of work that John would have expected.

"I love to meet with individuals to share the different ways we can improve their health by changing their smile. Most people underestimate the positive impact that good teeth can make in their lives. It's often the simple things that people appreciate the most like being able to eat at a restaurant without having to avoid certain foods because they can finally chew properly," says Dan.

John Gecelovsky

Implants are one of the best ways to improve your smile and health, and Dan has several options to meet your budget. Imagine no longer being embarrassed about your smile and feeling better physically. The Dan Landry Denture Clin-

ics take great pride in providing dentures that fit perfectly. They offer dental implants, denture repairs, night guards, partial dentures and sports guards as well as snoring appliances. No matter what issue you are dealing with, Dan Landry and his team of experts can help.

The main Dan Landry Denture Clinic recently moved and is now located at 2352 Howard Ave. (just north of Eugenie). The large, modern office showcases natural light and a comfortable atmosphere. Patients are enjoying the easy one floor access and ample free parking. The other clinics are located at 360 Notre Dame in the Belle River Dental Office and at 14 Gosfield Townline E. in Essex in the Essex Dental Centre.

The friendly staff are dedicated to ensuring that every client has a pleasant and professional experience. Electronic billing and filing is offered at every location and free estimates are always available.

Wear your teeth with confidence and get the radiant smile you deserve. Whether you prefer dentures or implants, one simple visit can improve your health and change your life. You are worth it!
